#DevCTrainingwithAndela

Welcome to the Learning Phase.

Andela   Developer Circles from facebook

All You Need To Know About Your Core Learning Track

Hello Learners,

Welcome to your Foundation Web Track of DevCTrainingwithAndela Program.

In this phase you will be required to consume learning content on the Open Classrooms platform. These contents will see you levelling up on the basics of HTML, CSS and Javascript while building teams and professional skills as well as creating basic web apps.

This track will also make available additional engaging content which you can access in the Group Units of your learner group. In this engagement learning phase you will be focusing on these areas of learning;

- Content SQL
- Relational database
- Test-driven development (TDD)

We will also be focusing on

- Git workflow
- CI/CD
- Debugging by making use of VS-Code and Chrome Dev tools
- And finally app performance

All the best!
